

KPI FOR DRILLING SERVICES

COMPANY PROFILE

KPI-DS: YOUR TRUSTED PARTNER IN RIG INSPECTION SOLUTIONS

KPI-DS is a leading provider of specialized inspection and technical services for the oil and gas industry. Established in 2018, we have built a strong reputation for technical expertise, reliability, and commitment to safety in the drilling industry. With over 6 years of proven excellence, we deliver comprehensive rig inspection and commissioning services.

ABOUT KPI-DS

Global Presence

Established in Egypt, with recent expansion in UEA, Oman, Kenya, South-Sudan, Uganda, Iraq, Kuwait, Libya, & Nigeria

Specialized Services

Primarily Rig Inspection Services with certified inspectors

Expert Team

Highly skilled engineers and consultants with extensive industry knowledge

A composite image featuring a worker in a white hard hat with a headlamp, viewed from the side and back. The worker is looking out over a city skyline at sunset, with a large, stylized orange outline of the word 'OUR' in the background. The sky is blue with white clouds, and the city lights are visible in the foreground.

OUR VISION AND MISSION

Vision

To be the global leader in providing specialized inspection and technical services for the oil and gas industry.

Mission

To deliver comprehensive and high-quality services that ensure operational excellence, safety, and reliability in the oil and gas industry.

CORE VALUES

Safety First

Health, Safety, Environment, and Quality must come first in everything we do.

Integrity

Treating ourselves and our business in an honest, ethical, and trustworthy manner.

Efficiency

Providing cost-efficient services to our customers.

LIST OF QUALIFICATIONS

API for Drilling Services (KPI-DS) is holding a prestigious international Accreditations & Memberships to be the ONLY Rig inspection provider in the Egyptian market that hold all these accreditations as follows:

Certifications:

ISO 9001:2015, - Quality Management System.

ISO 14001:2015 - Environmental Management System.

ISO 45001:2018 - Occupational Health & Safety Management System.

Accreditations:

ISO/IEC 17020:2012 - Conformity assessment — Requirements for the operation of various types of bodies performing inspection) TYPE A INSPECTION BODY.

Memberships:

DROPS membership.

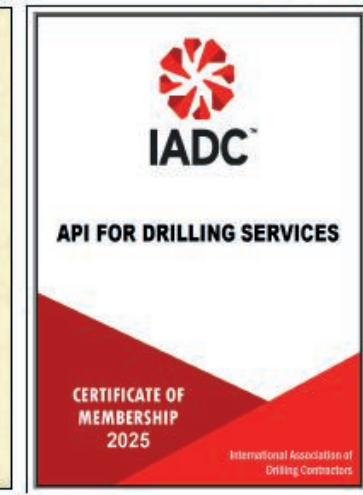

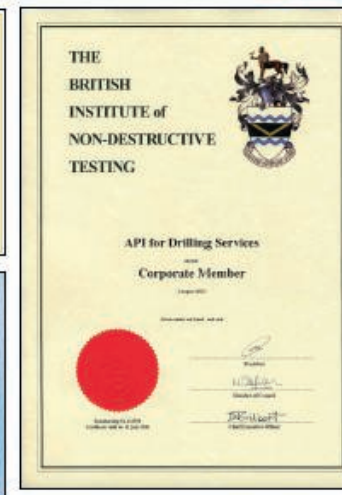

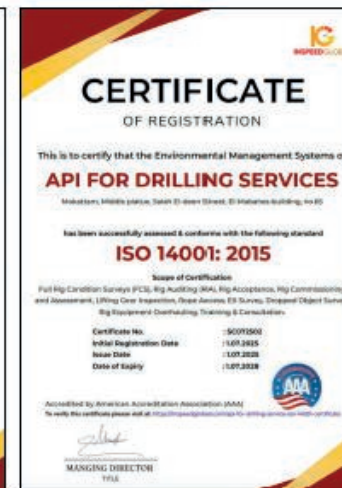

IADC Membership.

SPRAT Membership.

BINDT Membership.

LIST OF QUALIFICATIONS

The old name of the company was API FOR DRILLING SERVICES and changed to be KPI FOR DRILLING SERVICES with the same certifications and all legal documentation and personnel qualifications

QUALITY AT KPI-DS

Success Criteria

Quality of services and accurate pricing complemented with an effective marketing strategy.

Document Review

Reviewing all quality-related documents according to standards by qualified engineers.

Staff Training

Leading training and improvement of staff to foresee and prevent problems.

ISO Compliance

Following ISO 9001 and ISO 45001 Requirements for Safety and Environment.

Recently Accredited ISO 17020;2012 Inspection Body

OUR COMMITMENT

1

Complete and Integrated Services

2

High Ethical Standards

3

Zero Incident Policy

4

Comprehensive HSE Management

KPI-DS is dedicated to providing complete and integrated services for our clients, covering all aspects of requirements, training, services, and support.

OUR BUSINESS SERVICES

1

Rig Surveys and Audits

Full Rig Condition Surveys, Rig Auditing, Rig Acceptance, & Rig Commissioning and Assessments.

2

Specialized Inspections

Electrical Hazardous Area Inspection, Thermal Imaging Inspection, Lifting Gear Inspection, Rope Access, & Dropped Object Survey.

3

NDT and Engineering

NDT Inspection Services, Tubular Inspection, Welding Inspection, Hydro Testing, Engineering Inspection.

4

Additional Services

Training Services, Engineering Consultations, Manpower Supply.

KPI-DS

PROJECTS PORTFOLIO

KEY PROJECTS (2024-2018)

2018: Egypt

Rig Inspection Services consultancy

2019: Sudan

Rig Inspection, Rig Auditing, & Rig Acceptance Services for 2B OPPCO

2020: Ethiopia

Rig Inspection Workshop (RIW) Training Campaign

2021 - 2024 : Western Desert, Egypt

Rig Inspection, Auditing, & Acceptance Contract

Recent Projects (2022 - 2024)

2022: Juba, South Sudan

Sub-Contractor Rig Inspection, Rig Auditing, & Rig Acceptance Services

2022: Western Desert, Egypt

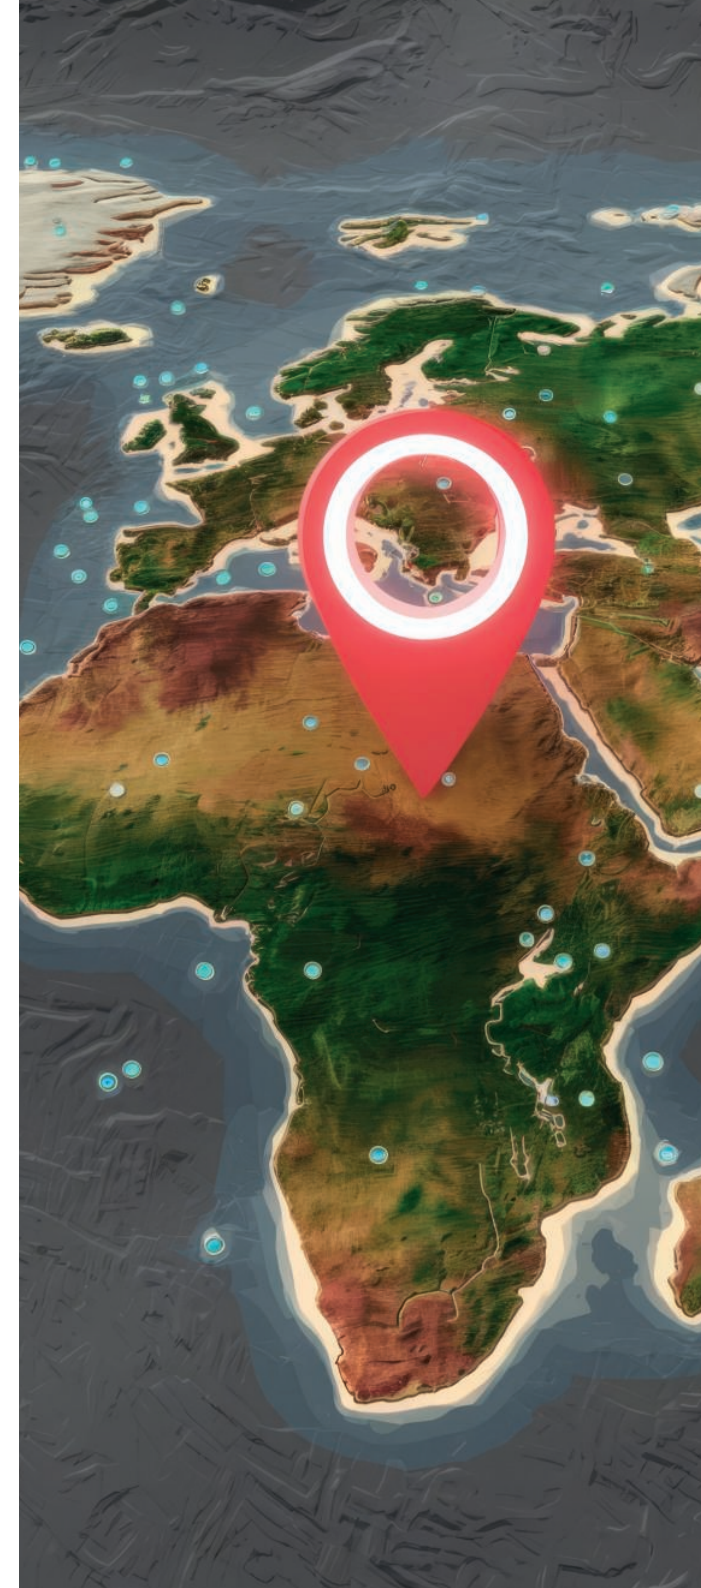

TBG EUE Thread Protectors

2023: DASCO for Petroleum Services, Egypt

Ex Survey, Dropped Object Survey, & RIW Training

2024: DASCO for Petroleum Services, Egypt

Ex Survey Campaign, Drops Campaign

KPI-DS REGIONAL EXPANSION

Oman

Partner: HEAVY EQUIPMENT MAINTENANCE AND TRADING LLC (HEMT)

Scope: All API-DS Offered Services

Iraq & UAE

Partner: NAFTA Technology Development Co.

Scope: All API-DS Offered Services, Training, and AZ well drilling data management

Libya

Partner: Geopetroleum for Oil & Gas, Mining, and Environmental Services (GPPG)

Scope: All API-DS Offered Services

KPI-DS

ACHIEVEMENTS OVER 6 YEARS

1

+200 Projects

Completed across various service types, including rig inspections, maintenance, and emergency repairs.

2

%80 Client Retention

Demonstrating trust in our expertise and services.

3

%25 Downtime Reduction

Average reduction in operational downtime across multiple clients.

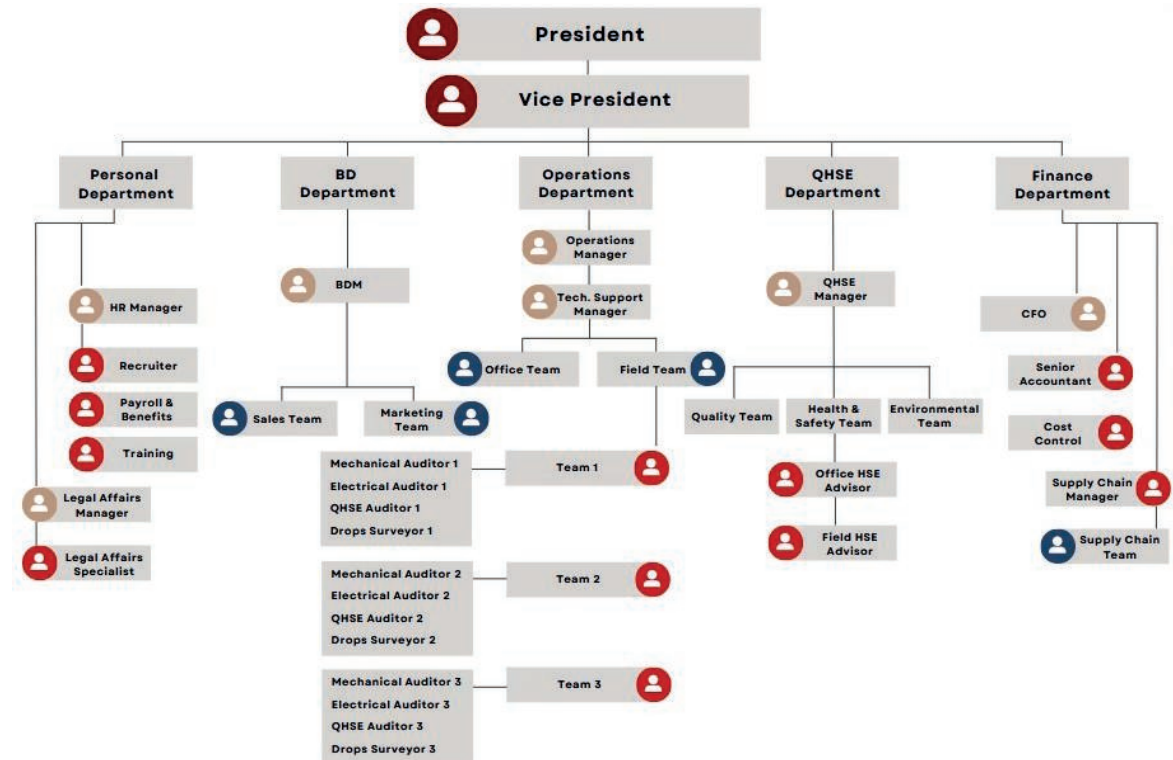

4

Zero Incidents

Reported during inspections and repairs, improving safety standards.

KPLD STRUCTURE

Our organizational structure ensures efficient operations and clear lines of responsibility across all our service areas.

TYPES OF RIGS AND APPLICABILITY

Onshore Rigs

Focus on structural stability, power systems, and mobility components.

Offshore Rigs

Emphasis on corrosion protection, stability in marine environments, and compliance with maritime regulations.

Jack-Up Rigs

Inspections of legs, jacking systems, and hull integrity.

Drill ships and Semi-Submersibles

Evaluations of dynamic positioning systems, ballast tanks, and subsea equipment.

CATEGORIZATION OF FINDINGS

1

Critical Issues Immediate risks to safety, integrity, or compliance

2

Major Issues Significant operational or safety risks if unaddressed

3

Minor Issues Cosmetic or low-risk issues

REPORTING SYSTEMS

1

Daily Reports

Immediate findings and progress updates

2

Action Tracker

Excel sheet for tracking issue resolution

3

HSE Report

Safety observations and recommendations

4

Final Report Including RBI

Risk Based Inspection Report as per API 580
Comprehensive overview of inspection results

ADVANCED RIG INSPECTION

A comprehensive, high-level inspection focusing on detailed assessments and advanced methodologies to evaluate the condition and performance of rig structures, systems, and components.

Rig Acceptance

Initial survey to establish a baseline for the rig's condition.

Full Condition Survey

Detailed inspection within the first six months to identify and address deeper issues.

Rig Audit

Periodic audits every 6 months to ensure sustained performance and compliance.

REMOTE RIG AUDIT

1

Digital Tools
Utilizing advanced sensors and communication technologies for remote monitoring.

2

Efficiency
Minimizing downtime and reducing costs through remote inspections.

3

Comprehensive Coverage
Monitoring safety, operational status, and regulatory compliance remotely.

ELECTRICAL HAZARDOUS AREA INSPECTIONS

Evaluating electrical installations in environments where there is a risk of explosion, such as offshore rigs or oil and gas facilities. Our certified inspectors conduct detailed assessments to ensure compliance with local and international safety standards (such as ATEX or IECEx).

Risk Identification

Identifying potential risks related to electrical systems in hazardous areas.

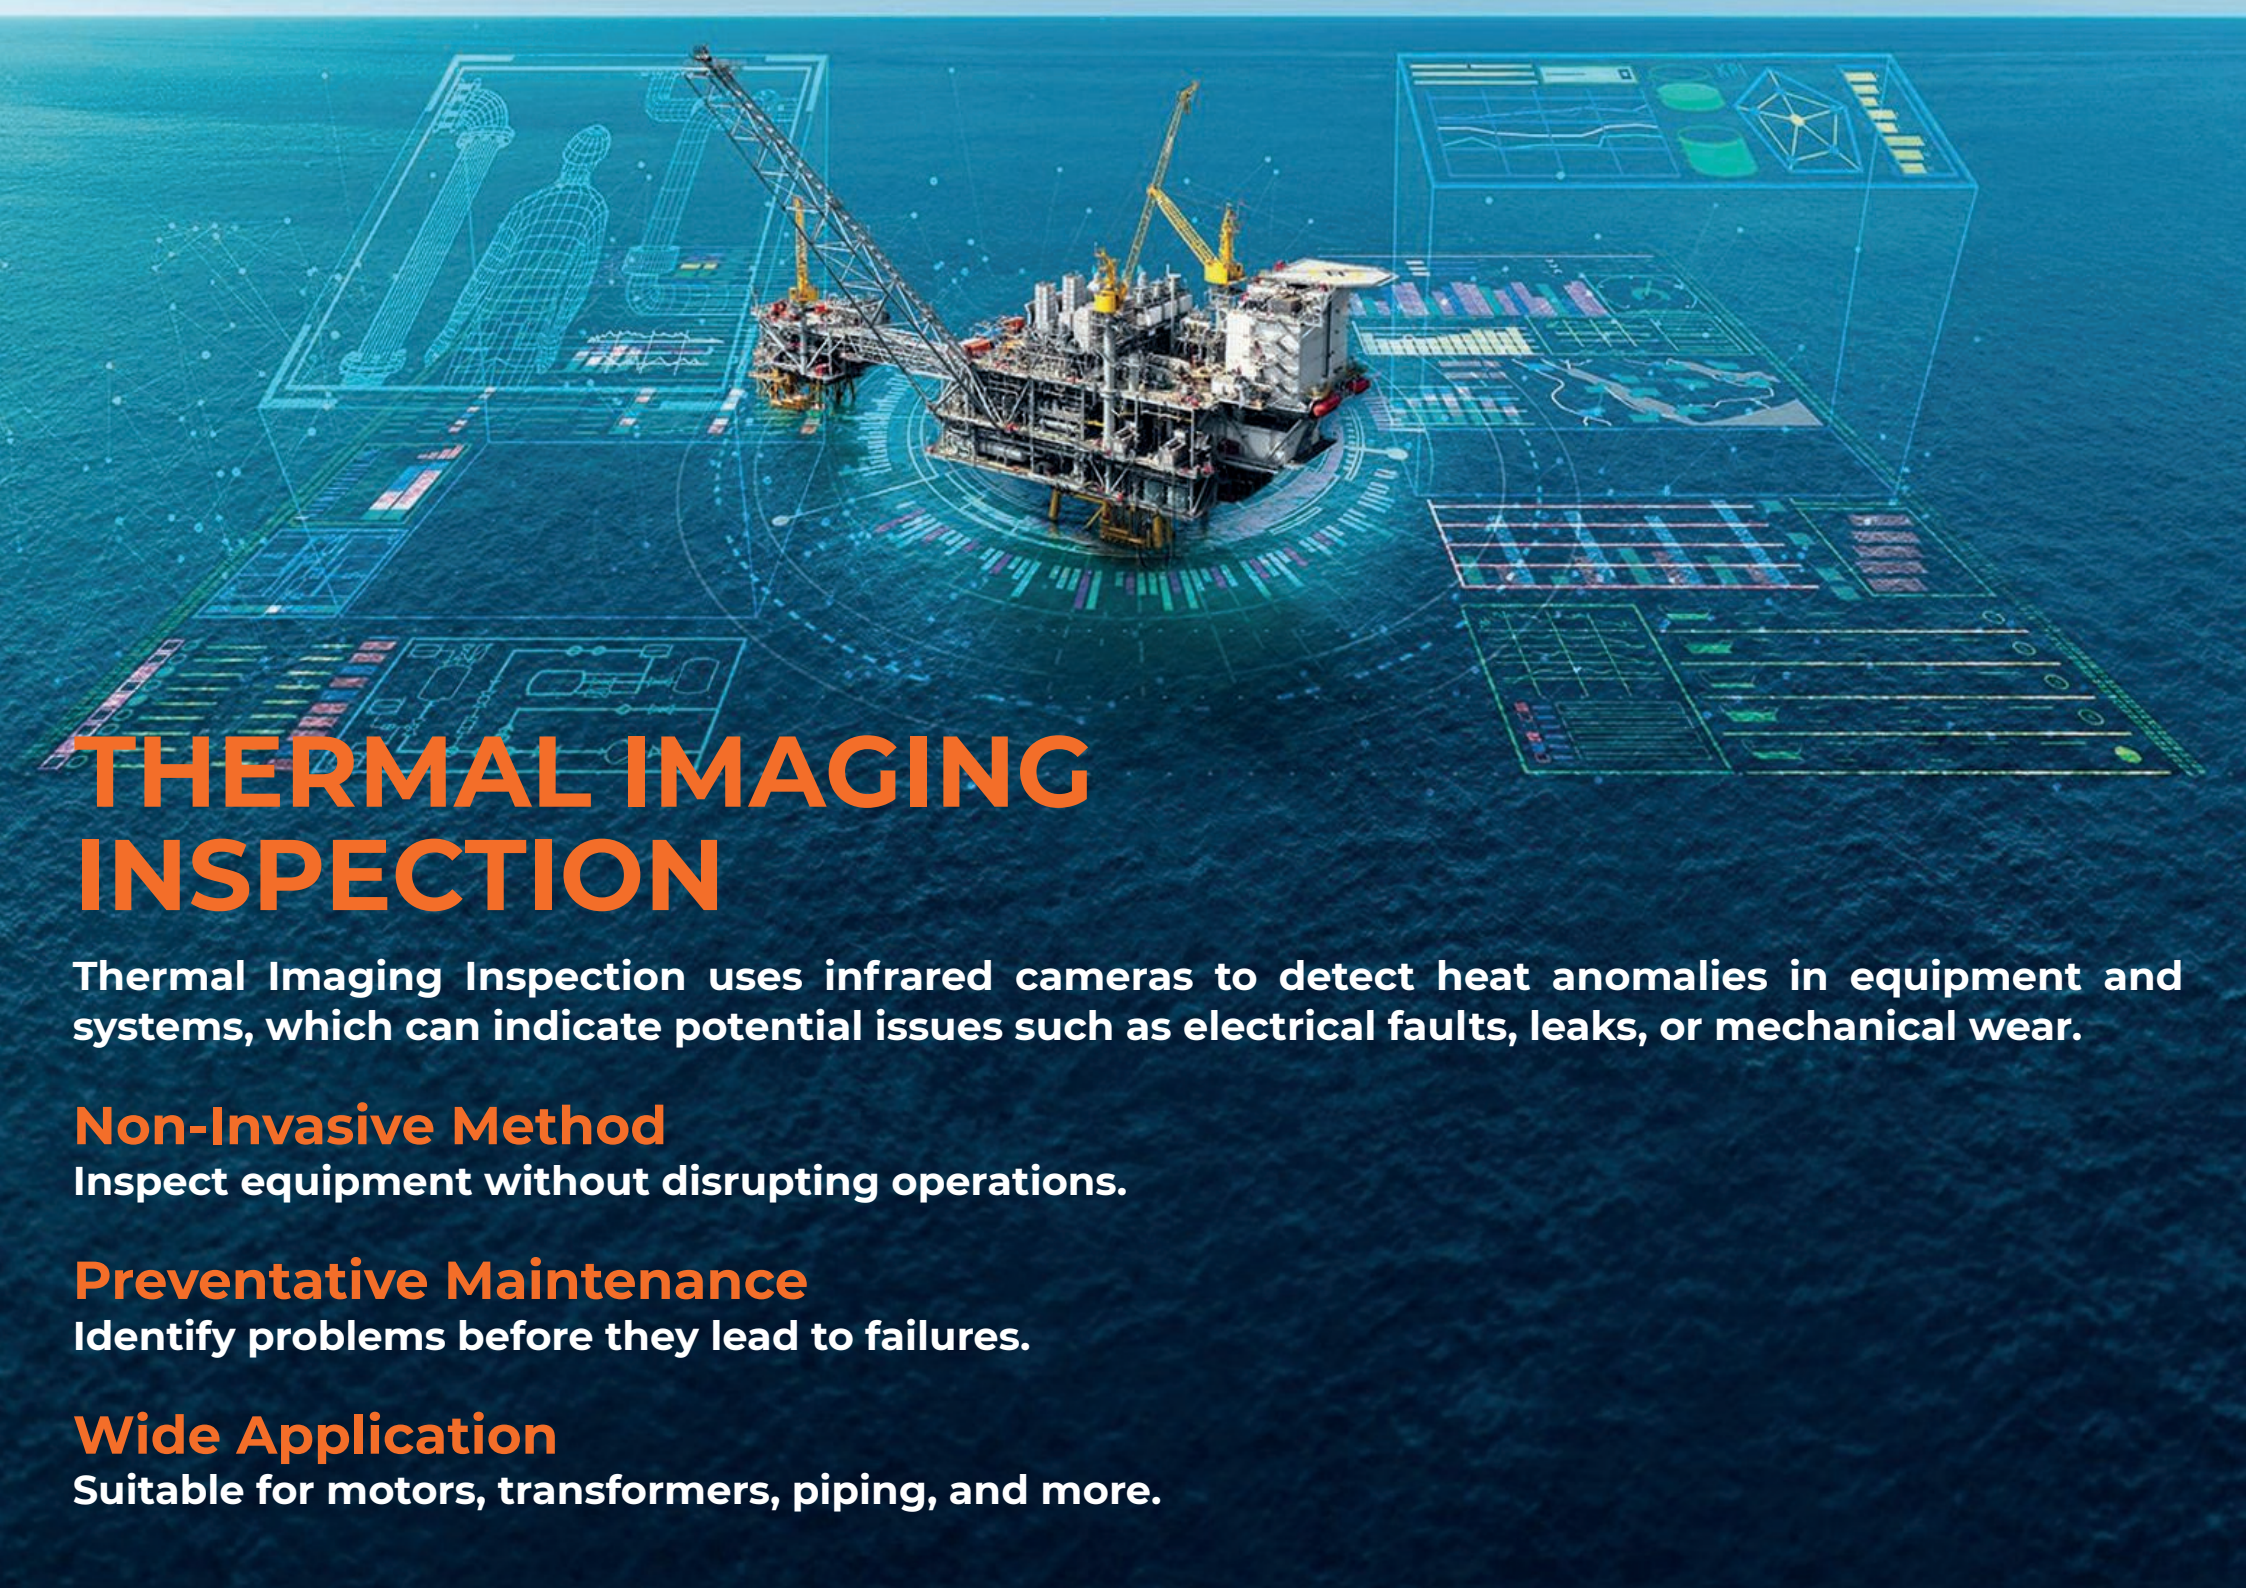

Compliance Assurance

Ensuring adherence to ATEX, IECEx, and other relevant standards.

Accident Prevention

Implementing measures to prevent electrical-related accidents in hazardous areas.

THERMAL IMAGING INSPECTION

Thermal Imaging Inspection uses infrared cameras to detect heat anomalies in equipment and systems, which can indicate potential issues such as electrical faults, leaks, or mechanical wear.

Non-Invasive Method

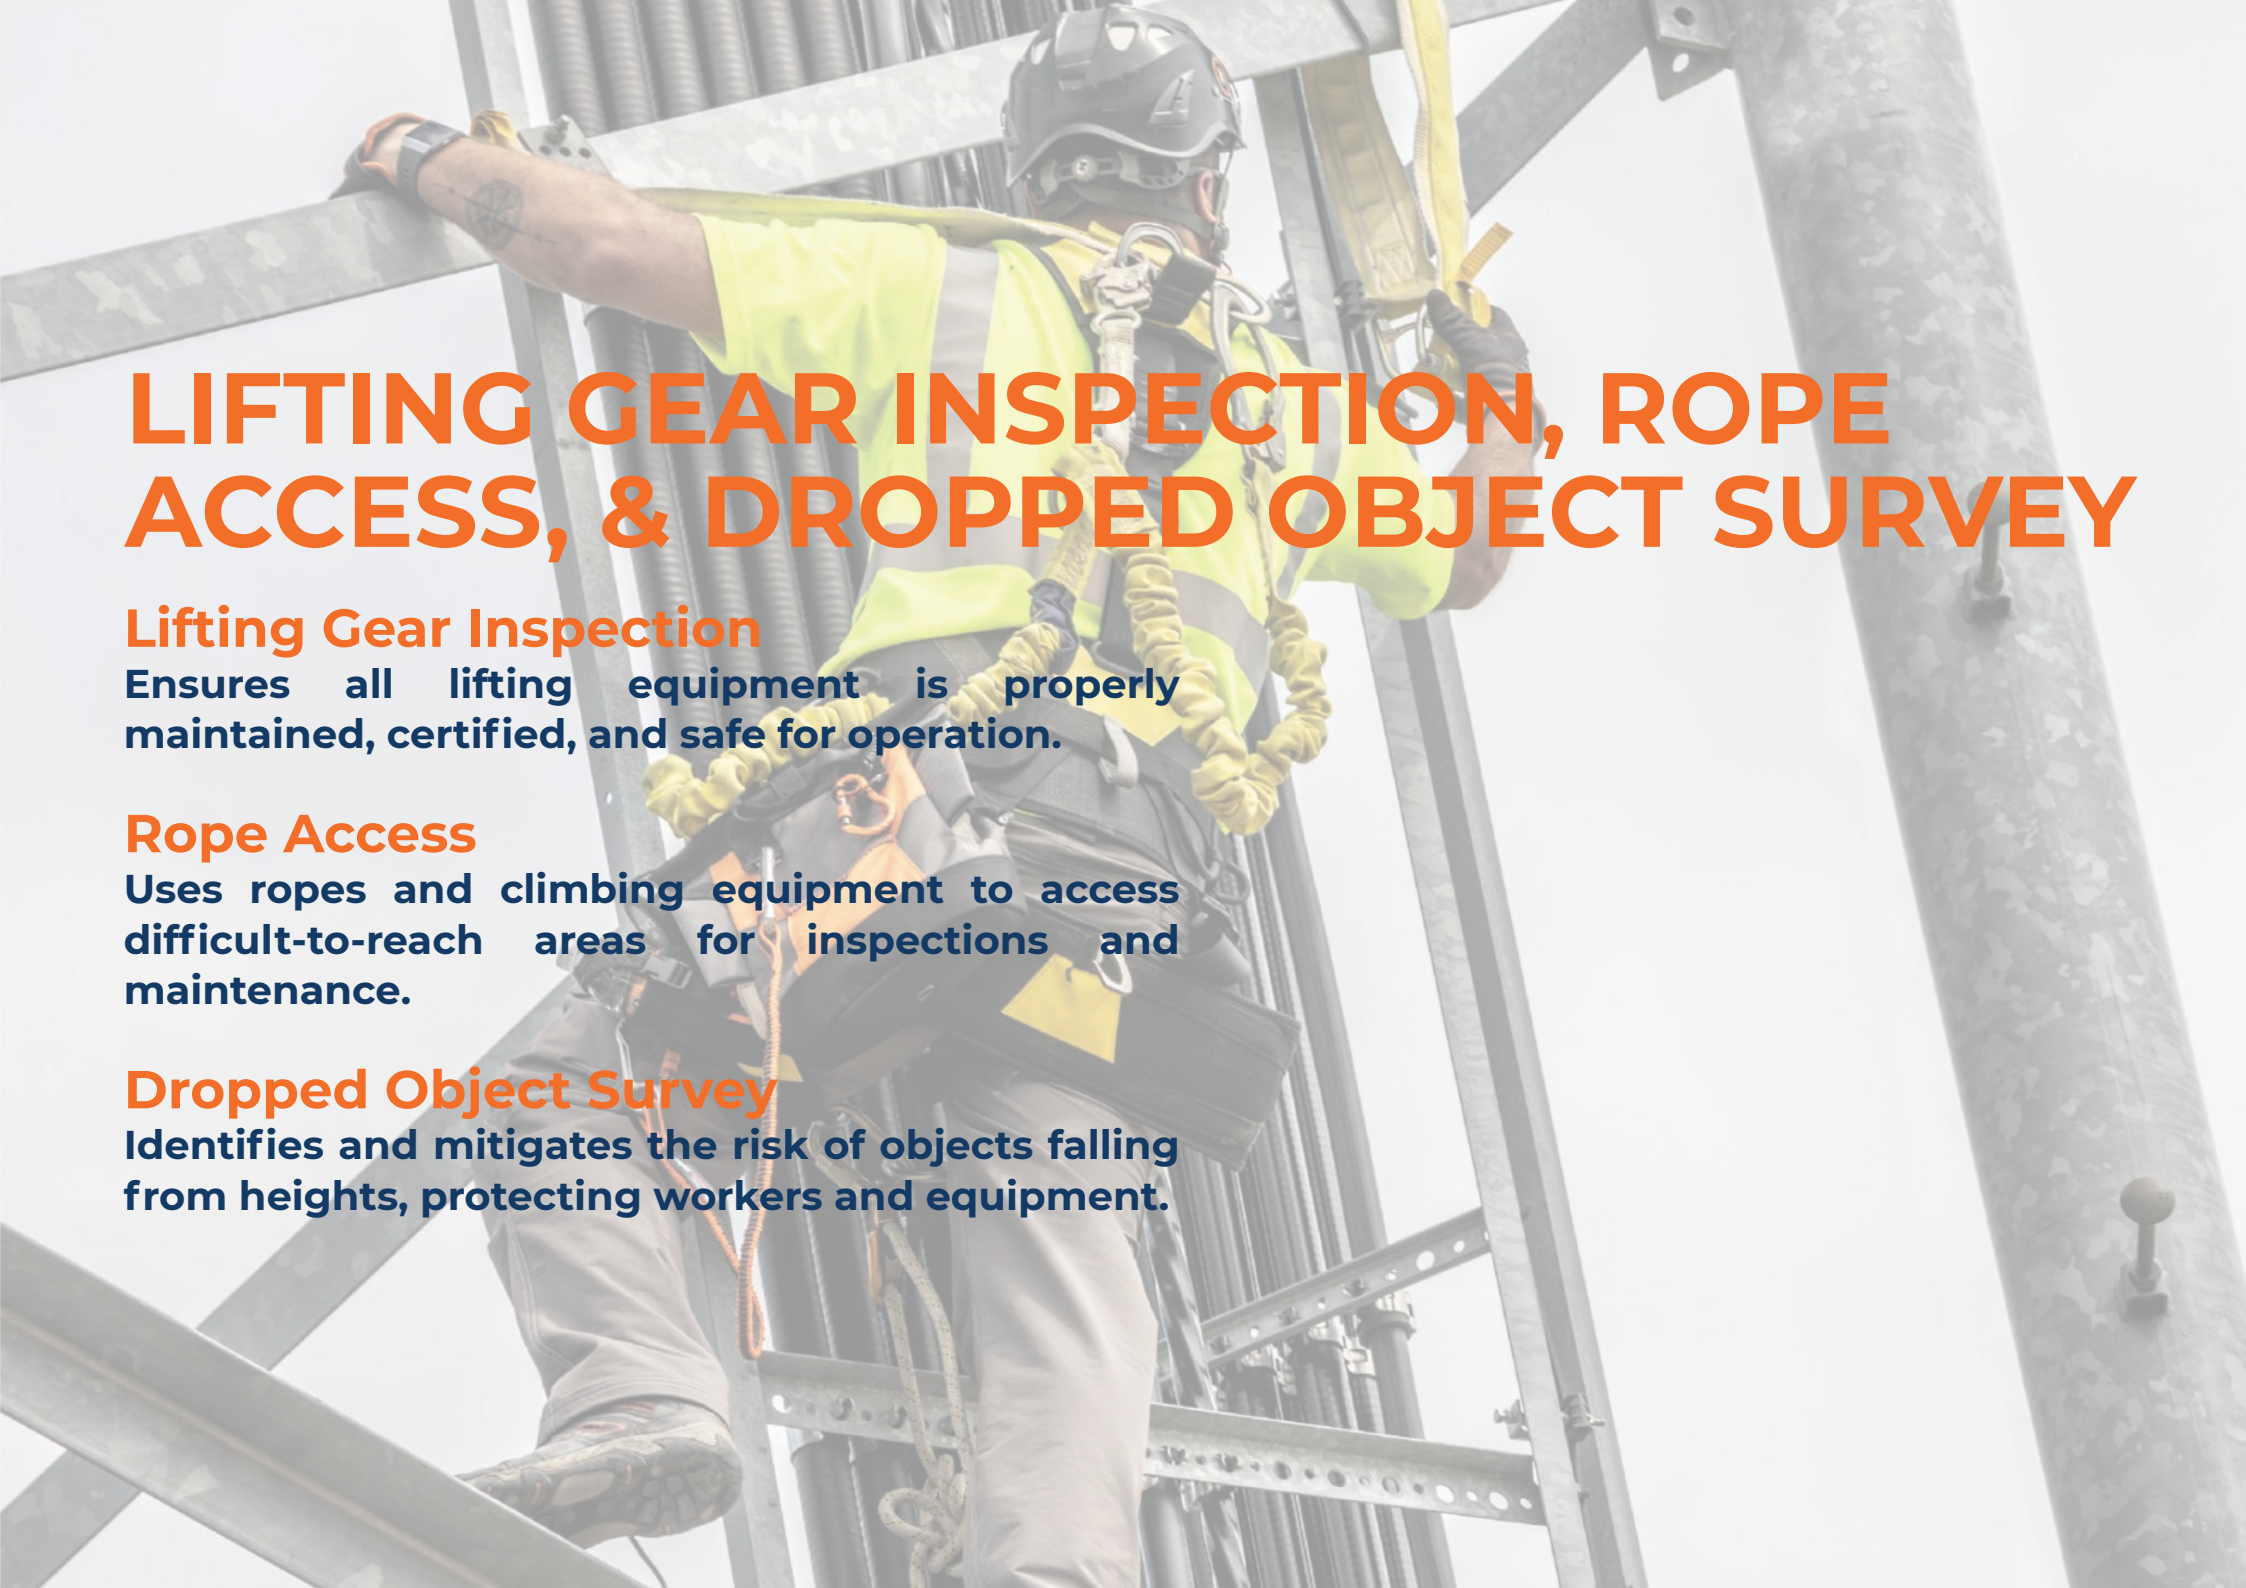

Inspect equipment without disrupting operations.

Preventative Maintenance

Identify problems before they lead to failures.

Wide Application

Suitable for motors, transformers, piping, and more.

LIFTING GEAR INSPECTION, ROPE ACCESS, & DROPPED OBJECT SURVEY

Lifting Gear Inspection

Ensures all lifting equipment is properly maintained, certified, and safe for operation.

Rope Access

Uses ropes and climbing equipment to access difficult-to-reach areas for inspections and maintenance.

Dropped Object Survey

Identifies and mitigates the risk of objects falling from heights, protecting workers and equipment.

WELDING INSPECTION SERVICES

1

Visual Inspection Testing (VT)

Cost-effective method for assessing surface defects and weld profiles.

2

Dye Penetrant Inspection (DPI)

Non-destructive testing to detect surface-breaking defects in non-porous materials.

3

Magnetic Particle Inspection (MPI)

Widely used NDT method for detecting surface and near-surface defects in ferromagnetic materials.

4

Ultrasonic Inspection (UT)

Highly accurate NDT method using high-frequency sound waves to detect internal defects.

TUBULAR INSPECTION SERVICES

Tubular goods, including drill pipes, casings, and tubing, require regular inspections to ensure structural integrity and safe operations.

Full-length Inspection

Examination of tubular goods for cracks, corrosion, and wear.

Thread Inspection

Detailed assessment of threaded connections.

Hardness Testing

Evaluating material properties for safety and performance.

HYDRO TESTING

Hydro Testing involves filling a pipeline, pressure vessel, or other container with water and pressurizing it to ensure it can safely withstand expected operational pressures.

Filling

Container filled with water

Pressurizing

Increase pressure to test levels

Monitoring

Observe for leaks or weaknesses

Evaluation

Assess structural integrity

TRAINING AND CONSULTANCY SERVICES

Rig Inspection Training

Comprehensive programs covering API standards, NDT methods, and rig components.

Consultancy Services

Operational assessments, compliance audits, and incident investigations.

Combined Programs

Integrating training and consultancy for holistic rig management and personnel development.

EQUIPMENT OVERHAULING

Exclusive Agency in Africa with expansion to MENA upon real opportunity requirement

Scope of the Agency

The Agency covers the following products from HEMT as an KPI Manufacturer to be distributed in Egypt and its neighboring countries across Africa:

KPI 6A : Cross-Over Connectors, Blind and Test Flanges, Tees & Crosses, Top Connectors, Adaptors & Spacer Spools.

KPI 16C : Rigid Chokes & Kill Lines.

KPI 16A : Adapters, Drilling Spools, and Spacer Spools.

KPI 8C : Hoisting Sheaves, Rotary Swivels, Travelling Blocks and Hook Blocks, Drilling Hooks, Bail Adapters, Power Swivels, Kelly Spinners, Pressure Vessels, and Piping mounted on hoisting equipment.

KPI 4F : Mast at PSL1, Crown Block Assembly at PSL1 & PSL2, Sub Structures at PSL1 and 2.

KPI 7K : Rotary Tables, Rotary Bushings, Rotary Slips, Draw Work Components, Piston Mud Pump Component.

KPI-DS granted as agent in terms of inspection, maintenance and audit certification of Drilling Rig or any other services equipment that serve in oil & gas drilling industry.

MANPOWER SUPPLY

KPI-DS supplies highly trained Drilling engineers, Rig Crew, and specialists for a range of tasks including inspections, maintenance, operations support, and project management.

Drilling Engineers

Experienced professionals for complex drilling operations.

Rig Crew

Skilled personnel for efficient rig operations.

Specialists

Experts in specific areas like NDT, maintenance, and project management.

WHY STANDARDS MATTER

KPI standards are the backbone of our operations, ensuring that every service we deliver meets stringent global benchmarks.

KPI RP 4G

Guidelines for inspection and maintenance of drilling structures.

KPI RP 7G

Procedures for drill stem elements.

KPI STD 53

Standards for blowout prevention equipment systems.

DROPS Guidelines

International best practices for mitigating dropped object hazards.

OUR STRENGTHS

Professional Expertise

Highly trained team with extensive experience in rig inspection and maintenance.

Adherence to Standards

Strict compliance with KPI standards and client-specific requirements.

Client-Centric Approach

Tailored solutions to meet unique client needs.

Innovative Solutions

Utilizing latest tools and technologies for precise and reliable results.

BENEFITS OF PARTNERING WITH KPI-DS

Uncompromised Safety

Adherence to KPI standards ensures highest safety levels, reducing risk to personnel and assets.

Enhanced Performance

Regular inspections and maintenance optimize rig functionality, minimizing downtime.

Cost Efficiency

Proactive identification of potential issues saves clients from costly repairs and operational disruptions.

Regulatory Compliance

Detailed audits and inspections ensure rigs meet international and local standards.
